

C-Class *for the small business in need of big features*

Small business, this is your system

Excellent functions are only the touch of a button away

Your business and your customers are important, and just because you run a small shop or station doesn't mean you should take a lax approach when it comes to your phone system. This is the precise logic behind ESI's C-Class, a series that thrives with big features and functions, but built for the small business world.

All-In One

- 20 Call processing ports (6 lines x 12 digital stations, 2 analog stations)
- Voicemail, automated attendant, music on hold

Call Handling

- Enhanced Caller ID
- Up to two conference calling bridges handling four parties each
- Dedicated overhead paging interface

Sophisticated Voicemail

- Easy to identify; ESI's patented blue voicemail key.
- Up to 10 guest mailboxes
- Off-premises "reach me" allows calls to be forwarded to your cell phone with the option to accept, or decline and send back to your office voicemail
- Live call recording allows moving and copying recordings to other mailboxes
- External message notification
- Three pre-recorded music-on-hold tracks, one recordable track, or one outside source

Automated Attendant

- Up to 18 available branches
- Virtually unlimited call routing, including off-premises transfer

24-Key Digital Feature Phone

- Designed for users requiring full access to system capabilities
- Rugged design resists abuse, spills
- Built-in speaker phone

12-Key Digital Feature Phone

- Designed for lobby, warehouse, or other areas that don't require access to all features
- Compact, fits in any decor
- Three dedicated keys for frequently used functions
