

ESI-600 *a marriage of IP and Digital technologies*

The future is here today

Excellent functions are only the touch of a button away

Introducing the ESI-600 - the system for the company looking for tomorrow's technologies today. Want IP? Want digital? It's all here on one converged platform, mixed with the powerful features and functions ESI is notorious for. Invest in your telecommunications future with the ESI-600.

System for Converged Communications

- 624 call processing ports, 32 voicemail channels, 1200 hours voicemail storage
- Support for hundreds of ESI phones in varying combinations (all IP: 408 stations, all digital: 336 stations)
- Handles up to 8 business tenants
- Voicemail, automated attendant, music on hold

Call Handling

- Enhanced Caller ID
- Account Codes
- Live call screening function
- Missed call key
- Supports up to 64 conference calls
- Highest grade voice quality (64 kilobit/sec)
- Trunk-to-trunk transfer

Sophisticated Voicemail

- Easy to identify; ESI's patented blue voicemail key.
- Urgent and external message notification
- Off-premises "reach me" allows calls to be forwarded to your cell phone with the option to accept, or decline and send back to your office voicemail
- Quick Groups allows easy movement of voice messages from mailbox to mailbox
- Live call recording allows moving and copying recordings to other mailboxes
- Multiple mailbox types – group, informational, cascade paging, and Q & A
- Virtual Answer Key makes it easy to place an important incoming call on hold allowing you to wrap up your present conversation

600 Optional
